

[QUIZ] What's Your #1 AI Prompt Mistake?
Stage 2

STAGE 2— AI-Experimenter Funnel — *You're already using AI. Let's fix what's stopping it from working.*

BUCKET D

The Scattered Prompter

"I've written great prompts before — I just can't find them or replicate them."

THE MISTAKE: *No system means no scale — individual prompt successes stay accidental and unrepeatable.*

WHO THEY ARE

Agency owners, consultants, freelancers, and experienced solopreneurs who have been using AI long enough to know that some prompts work brilliantly — but have never built a repeatable system around those wins. Their prompts are scattered across notes apps, email drafts, Google Docs, and browser history. Every good output was partly luck.

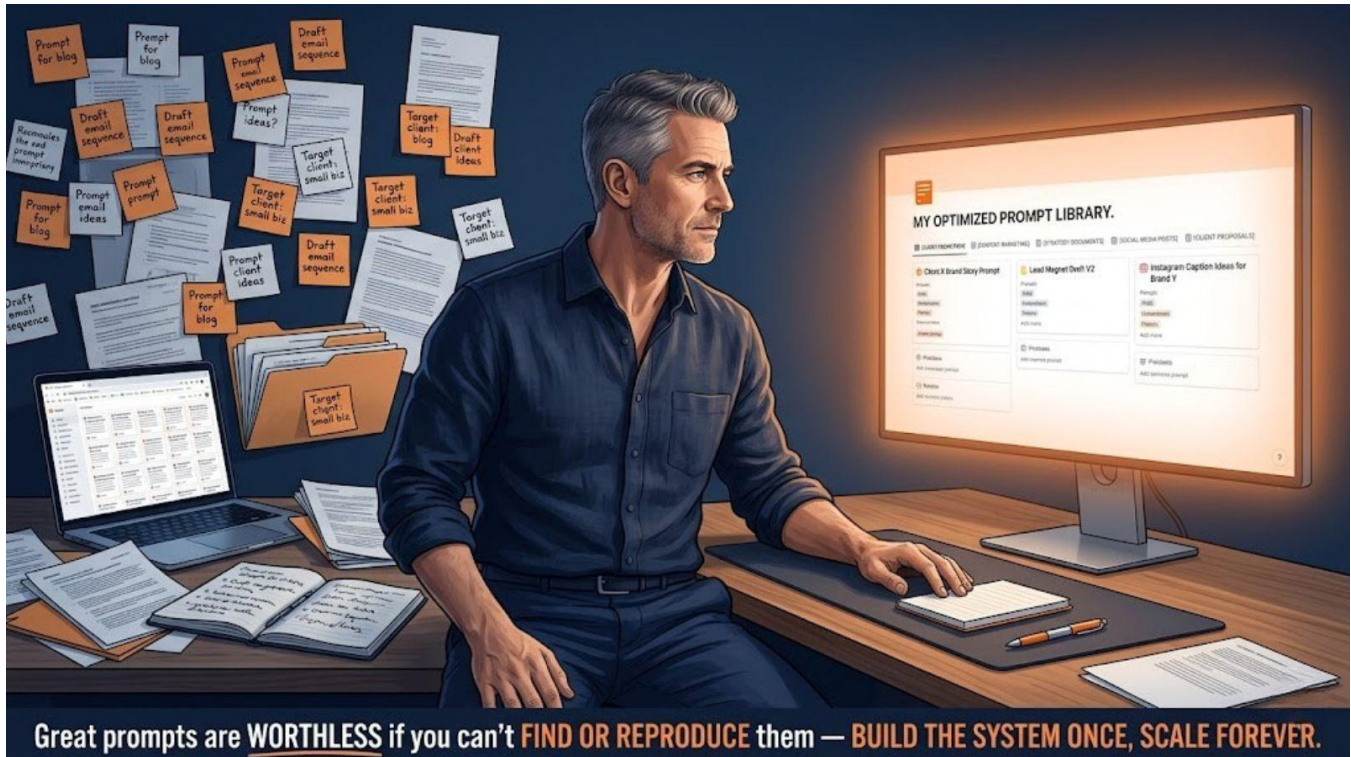

They can't train a team member on their AI process because there is no process. They understand AI's potential but haven't converted individual successes into a reliable, scalable workflow. Their best prompts are one-time events, not compounding assets.

OUTCOME PAGE DIAGNOSIS

The Scattered Prompter's problem isn't skill — it's architecture. You already know how to write prompts that work. What you're missing is the infrastructure to store, categorise, iterate, and share them. Without a prompt library system, your best prompts are one-time events. With one, they become compounding assets that improve every week.

The right prompt framework turns your scattered wins into a repeatable workflow — so every team member, every session, and every output starts from your best work, not from scratch. Expert AI Prompts provides that structured library: 50 industry-specific, strategically sequenced prompts per pack, built around the exact tasks your business runs on every day.

HERO IMAGE

Great prompts are WORTHLESS if you can't **FIND OR REPRODUCE** them — **BUILD THE SYSTEM ONCE, SCALE FOREVER.**

FREE DELIVERABLE — 1-Page Perfect Prompt Framework Guide

The master template for structuring any AI task — turns scattered wins into a repeatable system.
