LEVEL 3 — AI READINESS ASSESSMENT

The Builder

“AI is working well in parts of my business — I just can’t connect it all together.”

THE GAP: *Isolated AI wins not yet architected into a compounding cross-functional system.*

WHO THEY ARE

Business owners who have genuine, consistent AI wins in one or two areas of their business — content creation, client comms, or proposal writing — but haven’t yet built the cross-functional AI architecture that compounds those gains. They know what good AI output looks like. They have reliable prompts for their most-used tasks.

But the value isn’t spreading to the rest of their workflow, and they’re still manually handling significant chunks of work that AI could be covering. They’re at the most important inflection point on the curve: they’ve proved AI works, and they’re ready to build. What they’re missing is the architecture to connect existing wins into a full, compounding system.

AI READINESS SCORE REPORT

Your score places you at Level 3 — The Builder. You’re ahead of the majority of small business owners — and you’re standing at the most powerful inflection point on the AI adoption curve. Builders have already done the hard part: they’ve proved AI works in their business. What they haven’t yet done is turn isolated AI wins into a full, connected workflow system that covers all the key functions of the business.

The difference between a Builder and an Operator isn’t knowledge — it’s prompt depth and breadth. Operators have gone beyond single-task prompts into structured AI sequences that cover content, strategy, client communications, and operations simultaneously. Expert AI Prompts delivers that upgrade: not just better prompts for tasks you’re already doing — but complete prompt systems for every major function you’re still handling manually.

You've built the wins — now connect them into a compounding system that runs without you.

FREE DELIVERABLE — Free AI Business Strategy Playbook + 3 Bonus Strategy Prompts

Connect your existing AI wins into a full, compounding business system — starting this week.

Score Report — Upgrade Path Resources

YOUR UPGRADE PATH — 7-DAY ACTION SEQUENCE

1	IMMEDIATE	Download your AI Business Strategy Playbook — map where AI is already working in your business, then identify the 3 functions still running manually that prompt packs could cover.
2	QUICK WIN Day 2–3	Apply one of the 3 bonus strategy prompts to a business function AI isn't yet covering — compare the output directly to what you'd produce manually.
3	EDUCATION Day 3–5	Read ' Human Strategy + AI Execution: The Winning Formula ' and use the workflow audit to identify your highest-value AI expansion areas.
4	NEXT STEP Day 5–7	Explore multi-function prompt packs — B2B Marketing , Agency Growth , or Launch Strategist — and prioritise the one that fills your biggest remaining workflow gap.
5	NEXT Week 2	Review the Expert AI Prompts ROI Calculator — calculate the compounded time and revenue value of expanding from 1 AI function to 4 simultaneously.
