

[QUIZ] How AI-Ready Is Your Small Business?

Stage 3

STAGE 3 — AI-Adopter Assessment — SCORE Framework: 4 levels, 8 questions, 4–16 points.

LEVEL 1 The Bystander 4–7 pts	LEVEL 2 The Tinkerer 8–11 pts	LEVEL 3 The Builder 12–14 pts	LEVEL 4 The Operator 15–16 pts
-------------------------------------	-------------------------------------	-------------------------------------	--------------------------------------

SCORE
8–11
out of 16

LEVEL 2 — AI READINESS ASSESSMENT

The Tinkerer

“I use AI and sometimes it’s brilliant — but I can’t make it consistent.”

THE GAP: No repeatable prompt system — success is accidental and can’t be replicated or handed off.

WHO THEY ARE

Business owners who have found genuine value in AI but can’t systematise it. They have a handful of prompts they like, a few outputs they’re proud of, and a growing sense that AI should be saving them far more time than it currently does. But every session involves starting almost from scratch, trying to remember what worked last time, or rewriting mediocre outputs that don’t quite hit the mark.

The gap isn’t knowledge — it’s architecture. Their prompt process is entirely reactive and there’s no structure to build from or hand off. They’re getting results in spite of their process, not because of it. Every strong output was possible because something in that prompt happened to be right — but they don’t know exactly what, and can’t reproduce it reliably.

AI READINESS SCORE REPORT

Your score places you at Level 2 — The Tinkerer. You’ve already proven AI can work for your business. The problem isn’t the tool — it’s the framework around it. Tinkerers get results in spite of their process, not because of it. Every strong output you’ve produced was possible because something in that prompt was right: the right context, the right instruction, the right constraint.

The breakthrough comes when you understand what made that prompt work — and then build every future prompt around the same structure. The 1-Page Perfect Prompt Framework is exactly that structure: a repeatable, five-layer formula that turns your scattered wins into a reliable system. Expert AI Prompts takes that framework and applies it across 50 industry-specific tasks, so every prompt in your workflow is built on the same architecture that produced your best results.

Score Report — Upgrade Path Resources

YOUR UPGRADE PATH — 7-DAY ACTION SEQUENCE

1	IMMEDIATE	Download the 1-Page Perfect Prompt Framework — apply it to your 3 best-performing prompts right now and compare the new outputs with your originals.
2	QUICK WIN Day 2–3	Spend 30 minutes gathering your best prompts from wherever they're stored and rewrite each one using the 5-layer framework structure.
3	EDUCATION Day 3–5	Read ' Beyond ChatGPT: Why You Need Specialised Prompts ' and use it to identify the specific structural gaps in your current approach.
4	NEXT STEP Day 5–7	Explore the Expert AI Prompts pack matched to your primary use case from Q7 — replace your most-used prompts with structured, tested equivalents.
5	NEXT Week 2	Run the AI ROI Calculator — quantify the real cost of inconsistent AI results and compare it against a structured prompt library investment.
